Self-adhesive films

WHO IS HEXIS?

HEXIS is a leading manufacturer of self-adhesive films intended for visual communication

In 2014 the company celebrated its 25th anniversary, a quarter of a century of innovation!

HEXIS invests 3% of its turnover for R&D and employs 350 staff members worldwide. In 2005 HEXIS has been ISO 9001 certified for its Quality management system.

The company specializes in high-performance cast PVC, polyurethane and latex films. These films are made for professionals in digital printing, signage, visual communication, vehicle wrapping and textile marking.

The HEXIS Group has an international presence throughout its subsidiaries in the French West Indies, Germany, Italy, Spain, Sweden, the USA and a distribution network over the five continents.

The technical innovations developed by HEXIS for the sign industry professionals now extend to the world of interior decoration. This catalogue showcases among the most original and beautiful projects made by our clients. Our know how is at your service, your imagination does the rest!

10

GOOD REASONS TO CHOOSE HEXIS SELF- ADHESIVE FILMS FOR DECORATION

- + The HEXIS films are versatile and can be applied on any standard surfaces [walls, floors, windows], furniture and objects
- + Curved shapes can be wrapped thanks to our ultra-conformable technology
- + HEXIS offer a large selection of colours and effects, opaque or textured [alligator skin, leather, brushed aluminium, carbon fibre, wood], gloss or matt finish
- + For windows, you will find a selection of transparent, translucent, etched or frosted glass effects
- + Our overlamination films protect graphics and surfaces against scratches, graffiti and microbes
- + Once the film is applied, the surface become water-resistant and can easily be cleaned
- + Our films protect against wear and tear, even bacteria [PURE ZONE]
- + Unlike paint, HEXIS films do not require any drying time and do not leave any unpleasant odours
- + The ease of installation of our films allows fast refurbishment, without the need for major upheaval to your living or office space and no shutdown period
- + HEXIS quality: our films are made using only high quality materials and pigments to ensure colour fastness and long durability

APPLICATION GUIDE

PRÉPARATION :

You can apply HEXIS films on a wide variety of substrates, provided that surfaces are clean, dry, smooth and non-porous (unless otherwise specified). Ensure there are no traces of oil, grease, wax, silicone or other contaminants. To avoid surprises, assume that all surfaces are contaminated and should be cleaned.

Clean surface appearance - For all non-porous surfaces: before applying the film on the surface to be covered, we recommend you clean it with a mild solution FINAL CLEANER No.3 Dry with a clean, lint-free cloth.

Soiled or old surfaces: clean the surface with a cloth soaked in cleaning solvent CLEANER No.2 and dry with a cloth before evaporation.

Caution: never spray the liquid directly on the surface, always on a cloth.

FLAT SURFACES

- + Wear cotton gloves [GANTCOV]
- + Position the film on the surface
- + With the help of masking tape or magnets, make a horizontal hinge on the top part, preferably on a flat surface
- + Pull off 10 cm of liner and start applying the vinyl with a squeegee protected with a felt [MARBLEUF], making a 45° angle and applying from the centre to the edges
- + When applying on flat surfaces, press down hard over the entire surface, pay extra attention to the edges
- + Some products are available with HEX'PRESS liner: it offers easy and fast application especially useful for non-professionals

CURVED SURFACES

- + Remove the liner
- + Heat the vinyl between 40° and 50°C [104° and 122° F], then stretch it to wrap the convex surface
- + Apply the vinyl over the whole surface using a plastic felt-covered plastic squeegee [MARBLEUF], making sure to gently brush it on the convex area to eliminate all tensions and folds
- + Cut if necessary and reheat all the edges to 80° - 90°C [176° - 194° F] for the finishing
